CAREER OBJECTIVE

Looking for the opportunity of Front-end developer to enhance my professional skills and to become successful expert in the field of Information Technology by channelizing my technical knowledge and skills to ensure personal and professional growth.

PROFILE SUMMARY

Trained in ReactJS for creating web-applications.

- Proficient in frontend technologies like HTML and CSS.
- Comfortable in designing responsive webpages using Bootstrap library.
- Proficient in Javascript for designing interactive websites.
- Familiarity with Typescript.
- Proficient in using ReactJS Components and Event handling.
- Good knowledge in using ReactJS Hooks like useState, useEffect, useRef, etc...
- Proficient in handling forms using Formik library.
- Expert in Routing using React-routerV6.
- Adequate knowledge in state management in ReactJS applications using Redux and Redux Toolkit.

INTERNSHIP

Completed ReactJS internship at Edupoly Solutions Private Limited from Oct 2023 to Jan 2024.

- Tasks included HTML/CSS assignments, learning Bootstrap for responsive design, and building interactive websites with JavaScript.
- Received comprehensive training in ReactJS, completing multiple projects demonstrating proficiency.
- Collaborated effectively with team members, displaying dedication and eagerness to learn.
- Well trained in ReactJS library and also completed several projects.

SKILLS

Languages:

HTML

CSS

Bootstrap

Javascript

Libraries:

ReactJS

Formik

React-router-domV6

Redux

Redux-Toolkit

Projects

1. Shopping E-commerce Application:

- Implemented a versatile e-commerce platform catering to a diverse range of products, accessible conveniently from the comfort of home via the Internet.
- Designed and constructed the front-end web application using the ReactJS library, harnessing the power of Redux for state management, alongside JavaScript, CSS, HTML, and Bootstrap for responsive and visually appealing interfaces.
- Employed Formik and Yup libraries to ensure robust form validation, enhancing user experience and data integrity.
- Utilized Axios to interact with server-side Restful APIs, facilitating seamless data retrieval and updates.
- Implemented dynamic routing functionality using react-router, enabling smooth navigation and user interaction within the application.
- Continuously optimized performance and user experience through iterative testing and refinement processes. Fetched data from server by using Axios.
- Crafted a responsive design with media queries in CSS, ensuring seamless browsing across various devices and screen sizes.

2. Calculator:

- Developed an HTML file outlining a straightforward calculator interface, featuring an input display and buttons for numeric input and operators, complemented with visually appealing styling using CSS.

Implemented essential calculator functionality using JavaScript functions, including appending values to the display, clearing the display, and executing calculations accurately.

ACADEMIC PROFILE

- Bachelor's Degree in Electronics from Sri Y N College (Adikavi Nannaya University) (2020-2023).
- Intermediate in MPC from Gowthami Junior College in Narasapur.
- SSC from Pratibha E.M High School in Mogaltur.
